DETAILED ACTION

The restriction set forth in the previous office action is vacated, and the following rejection on prior art is submitted here below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Niedecker '489.

Niedecker teaches a process and apparatus for filling artificial casings. More specifically, the apparatus of Niedecker, as clearly seen in Figures 1 and 2 show an elongated hollow tube having an outer surface and a center bore. The bore being surrounded by a cylindrical wall. A plurality of spaced openings extending between the annular open chamber and the outer surface of the hollow tube. The spaced openings decrease in size as they near the discharge end. Regarding claims 3 and 10, element 5 of Niedecker is considered to be a follower against a upstream end of the natural casing to slide the natural casing forwardly along the stuffing tube.

Conclusion

Summary: Claims 1-10 are rejected.
